

FREIGHT HOUSE LOFTS

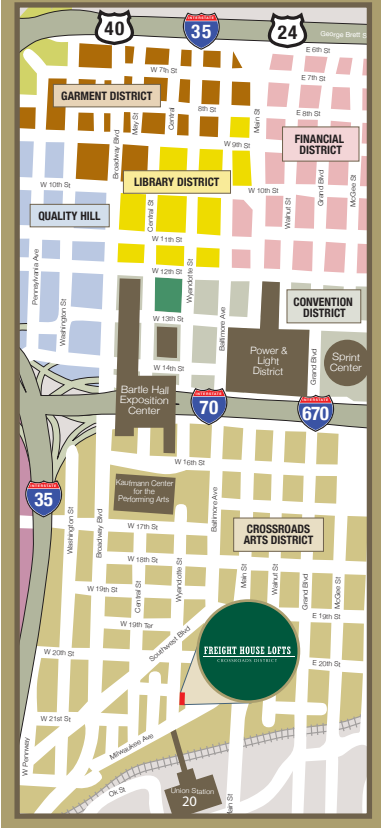

CROSSROADS DISTRICT

This four-story building was constructed in 1929 and was originally the distribution and manufacturing center for Safeway Stores.

It now houses a variety of one and two bedroom lofts. A variety of elegant floor plans with large windows with great views are available, ranging in size from 700 to 1,400 square feet. The building renovation incorporated into these unique living spaces polished hardwood floors, modern kitchens, and soaring concrete ceilings.

Located in the heart of Kansas City's historic Freight District, the Freight House Lofts are within easy walking distance of the First Friday's art neighborhood, many fine restaurants, coffee houses and much more. This property has a secured entry, great views, fitness center with Jacuzzi and gated and covered parking is available next to the building.
